# Overview

## Learning Objectives

In this lab, you will do the following:

- Explore the Healthcare Data Model
- Navigate the Care Management application
- Create a new Location record

## Prerequisites

- None

## Care Management Application

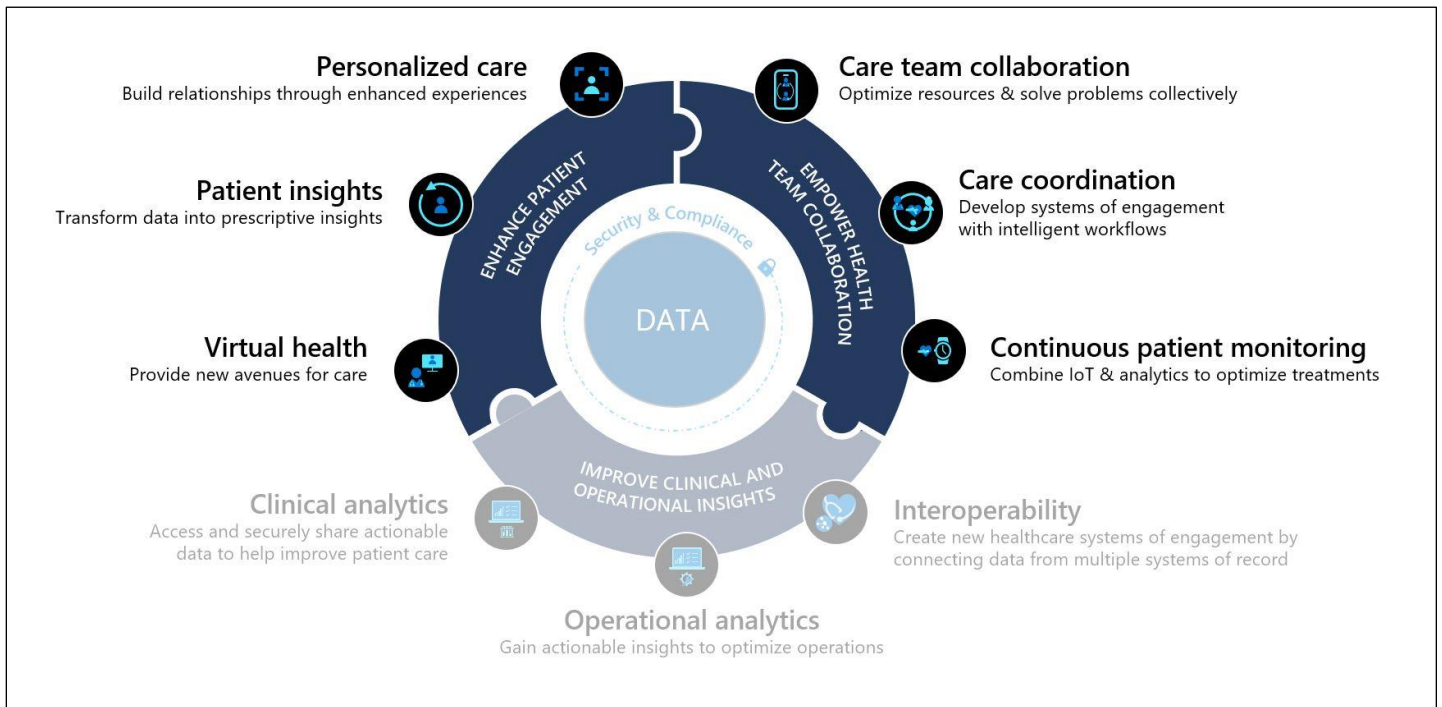

The **Care Management** application allows healthcare systems to provide coordinated care to each patient by quickly communicating the right information, at the right time, to the right people. Users can easily create, personalize, and enable new care plans for patients, manage care teams, and view patients' clinical timelines and care insights right within the application.

Key capabilities for Care Management include the following:

- **Care team:** View and collaborate with care teams to provide the best care for the patient.
- **Care plan:** Create and assign care plans and automate adherence to improve care coordination for your patients.
- **Clinical timeline:** Concise, sequential, and interactive view of patient's clinical occurrences.
- **Virtual clinic:** Provide your care team members the ability to perform virtual appointments with patients.

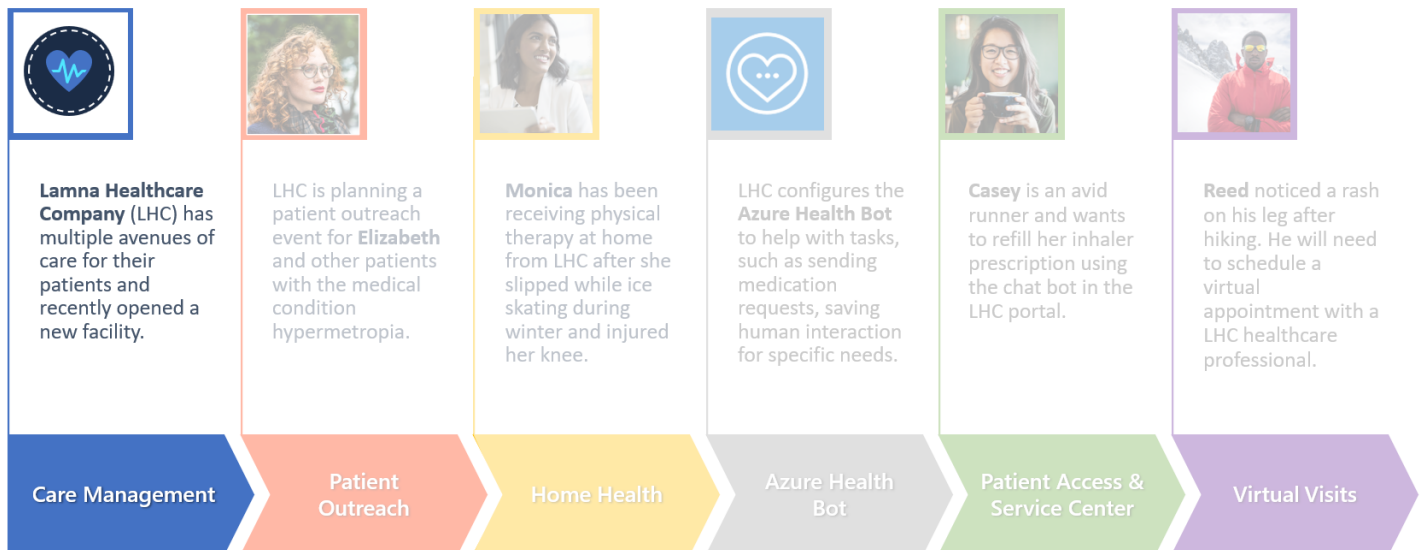

## Industry Prioritized Scenarios

Care Management focuses on both **Enhance patient engagement** and **Empower health team collaboration** priority scenarios. It creates a system that allows for enhanced care team collaboration and coordination, virtual care options, and a 360 view of patient healthcare data including patient insights.

## Healthcare Story

This lab will focus on the story of Lamna Healthcare Company, who is opening a new location in Redmond, WA.

Now that Lamna Healthcare Company's new location is ready to open, we need to ensure the new location record is in the system and that the employees understand the healthcare data model basics and how the tables and relationships are surfaced in the Care Management application.

# Exercise 1: Explore the Healthcare Data Model

In this exercise, you will learn about the core care management data tables. If you'd like to explore the tables in deeper detail on Microsoft Docs, please visit [Overview of Microsoft Cloud for Healthcare entities](#).

The healthcare data model uses some of the out-of-the-box tables from Dynamics 365 applications. The following Healthcare solutions use the built-in Dynamics 365 tables:

Healthcare solution	Dynamics 365 tables
Care Management	Account, Activities, Contact, Tasks
Home Health	Bookings, Incident, Products, Work Order
Patient Outreach	Lead/Lead Score, Marketing Emails, Contact, Tasks
Patient Service Center	Agent Script, Knowledge Article, Queues, Survey Response

Visit [Healthcare data model overview](#) on Microsoft Docs to learn more about the Healthcare data model.

## Task 1: Navigate Patient Details Tables and Relationships

In this task, you will explore the main tables related to Patient Data. Select each table name to navigate to the Microsoft Docs page that goes into detail about each table.

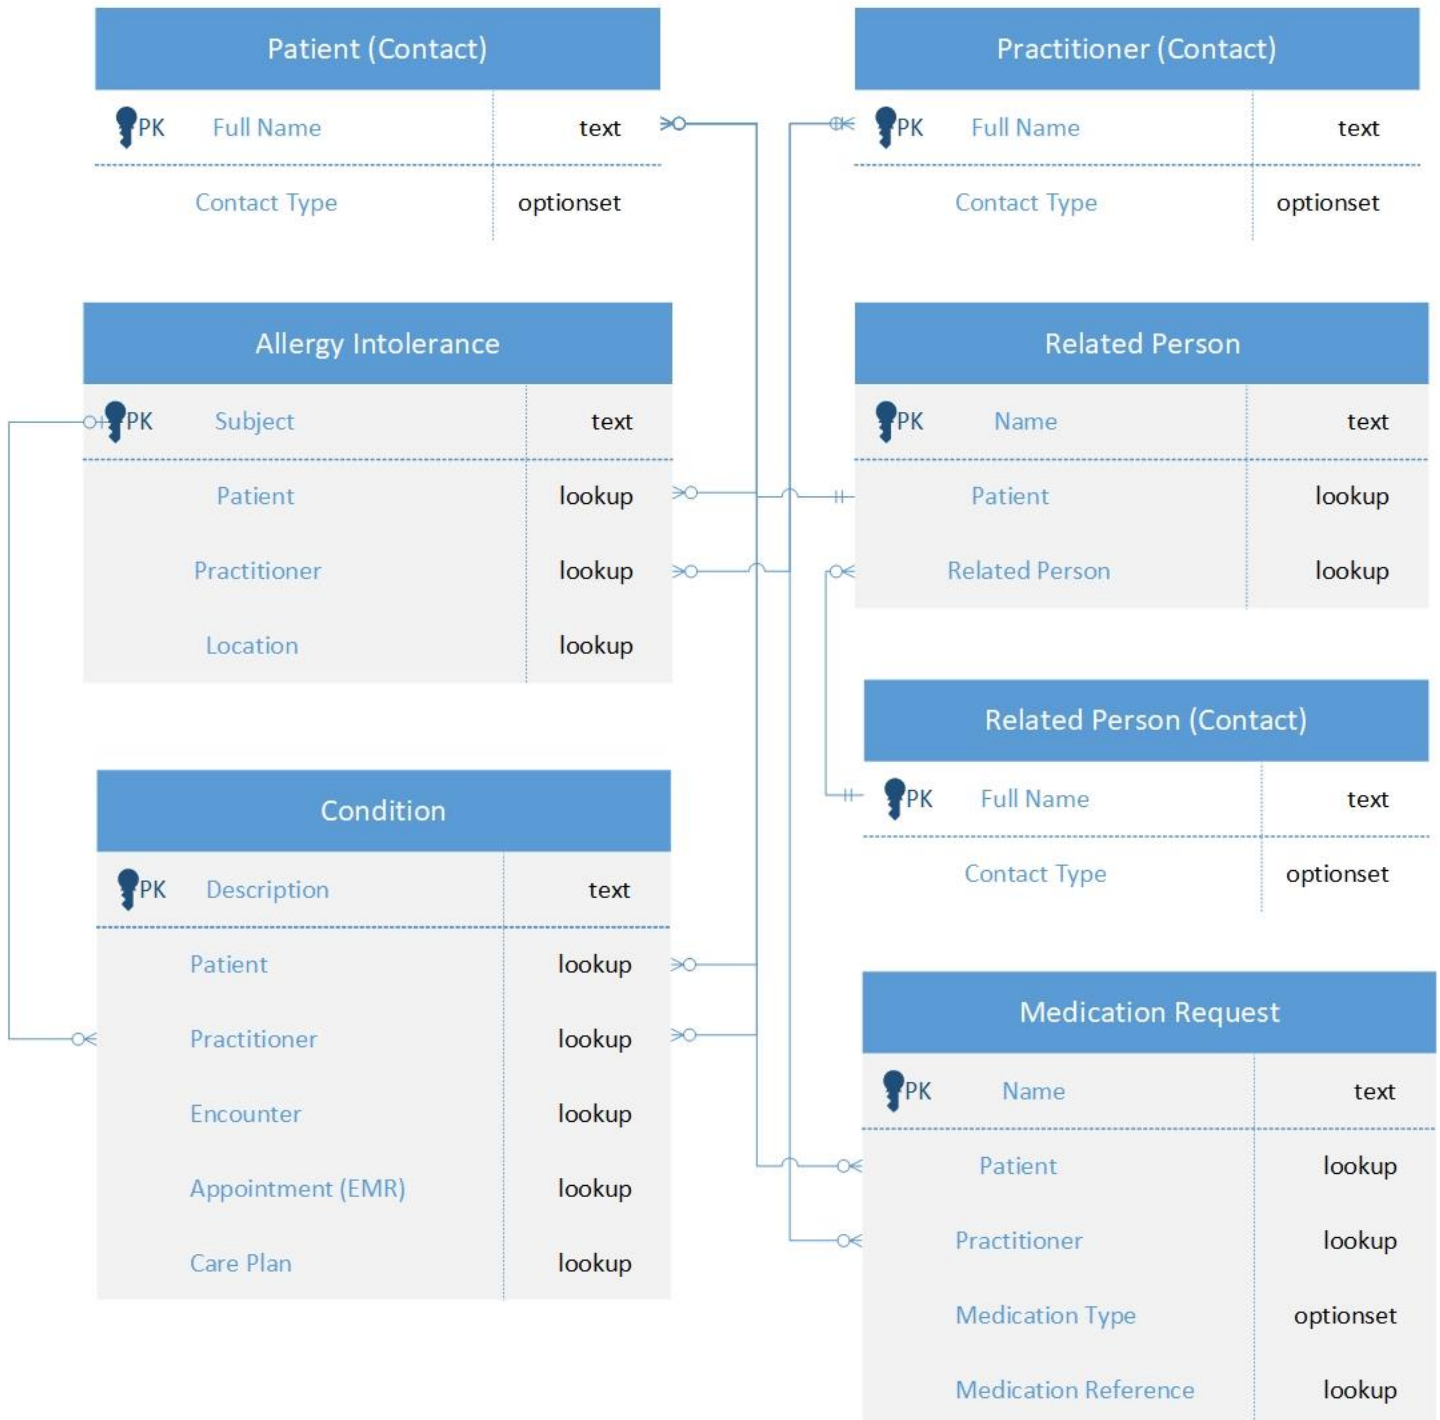

### Patient Detail Table Definitions

<a href="#">Patient (Contact)</a>	Person with whom a business unit has a relationship, such as customer, supplier, and colleague.
<a href="#">AllergyIntolerance</a>	Risk of harmful or undesirable, physiological response which is unique to an individual and associated with exposure to a substance.
<a href="#">Condition</a>	A clinical condition, problem, diagnosis, or other event, situation, issue, or clinical concept that has risen to a level of concern.
<a href="#">MedicationRequest</a>	An order or request for both supply of the medication and the instructions for administration of the medication to a patient.
<a href="#">RelatedPerson</a>	Information about a person that is involved in the care for a patient, but who is not the target of healthcare, nor has a formal responsibility in the care process.

See next page for the Patient Detail Entity Relationship Diagram.

# Patient Details

## Entity-Relationship Diagram

## Task 2: Navigate Clinical Data Tables and Relationships

In this task, you will explore the main tables related to Clinic Data. Select each table name to navigate to the Microsoft Docs page that goes into detail about each table.

### Clinical Data Table Definitions

<a href="#">Patient or Practitioner (Contact)</a>	Person with whom a business unit has a relationship, such as customer, supplier, and colleague.
<a href="#">Organization</a>	Top level of the Microsoft Dynamics 365 business hierarchy. The organization can be a specific business, holding company, or corporation.
<a href="#">Location</a>	Details and position information for a physical place where services are provided and resources and participants may be stored, found, contained or accommodated.
<a href="#">AppointmentEMR</a>	A booking of a healthcare event among patient(s), practitioner(s), related person(s) and/or device(s) for a specific date/time. This may result in one or more Encounter(s).
<a href="#">Procedure</a>	An action that is or was performed on a patient. This can be a physical intervention like an operation, or less invasive like counseling or hypnotherapy.
<a href="#">Encounter</a>	An interaction between a patient and healthcare provider(s) for the purpose of providing healthcare service(s) or assessing the health status of a patient.
<a href="#">EpisodeOfCare</a>	An association between a patient and an organization / healthcare provider(s) during which time encounters may occur.
<a href="#">Observation</a>	Measurements and simple assertions made about a patient, device or other subject.
<a href="#">CodeableConcept</a>	A Codeable Concept represents a value that is usually supplied by providing a reference to one or more terminologies, but may also be defined by the provision of text.

See next page for the Clinical Data Entity Relationship Diagram.

# Healthcare Clinical Data

## Entity-Relationship Diagram

### Task 3: Navigate Care Plan Management Tables and Relationships

In this task, you will explore the main tables related to Care Plan Management. Select each table name to navigate to the Microsoft Docs page that goes into detail about each table.

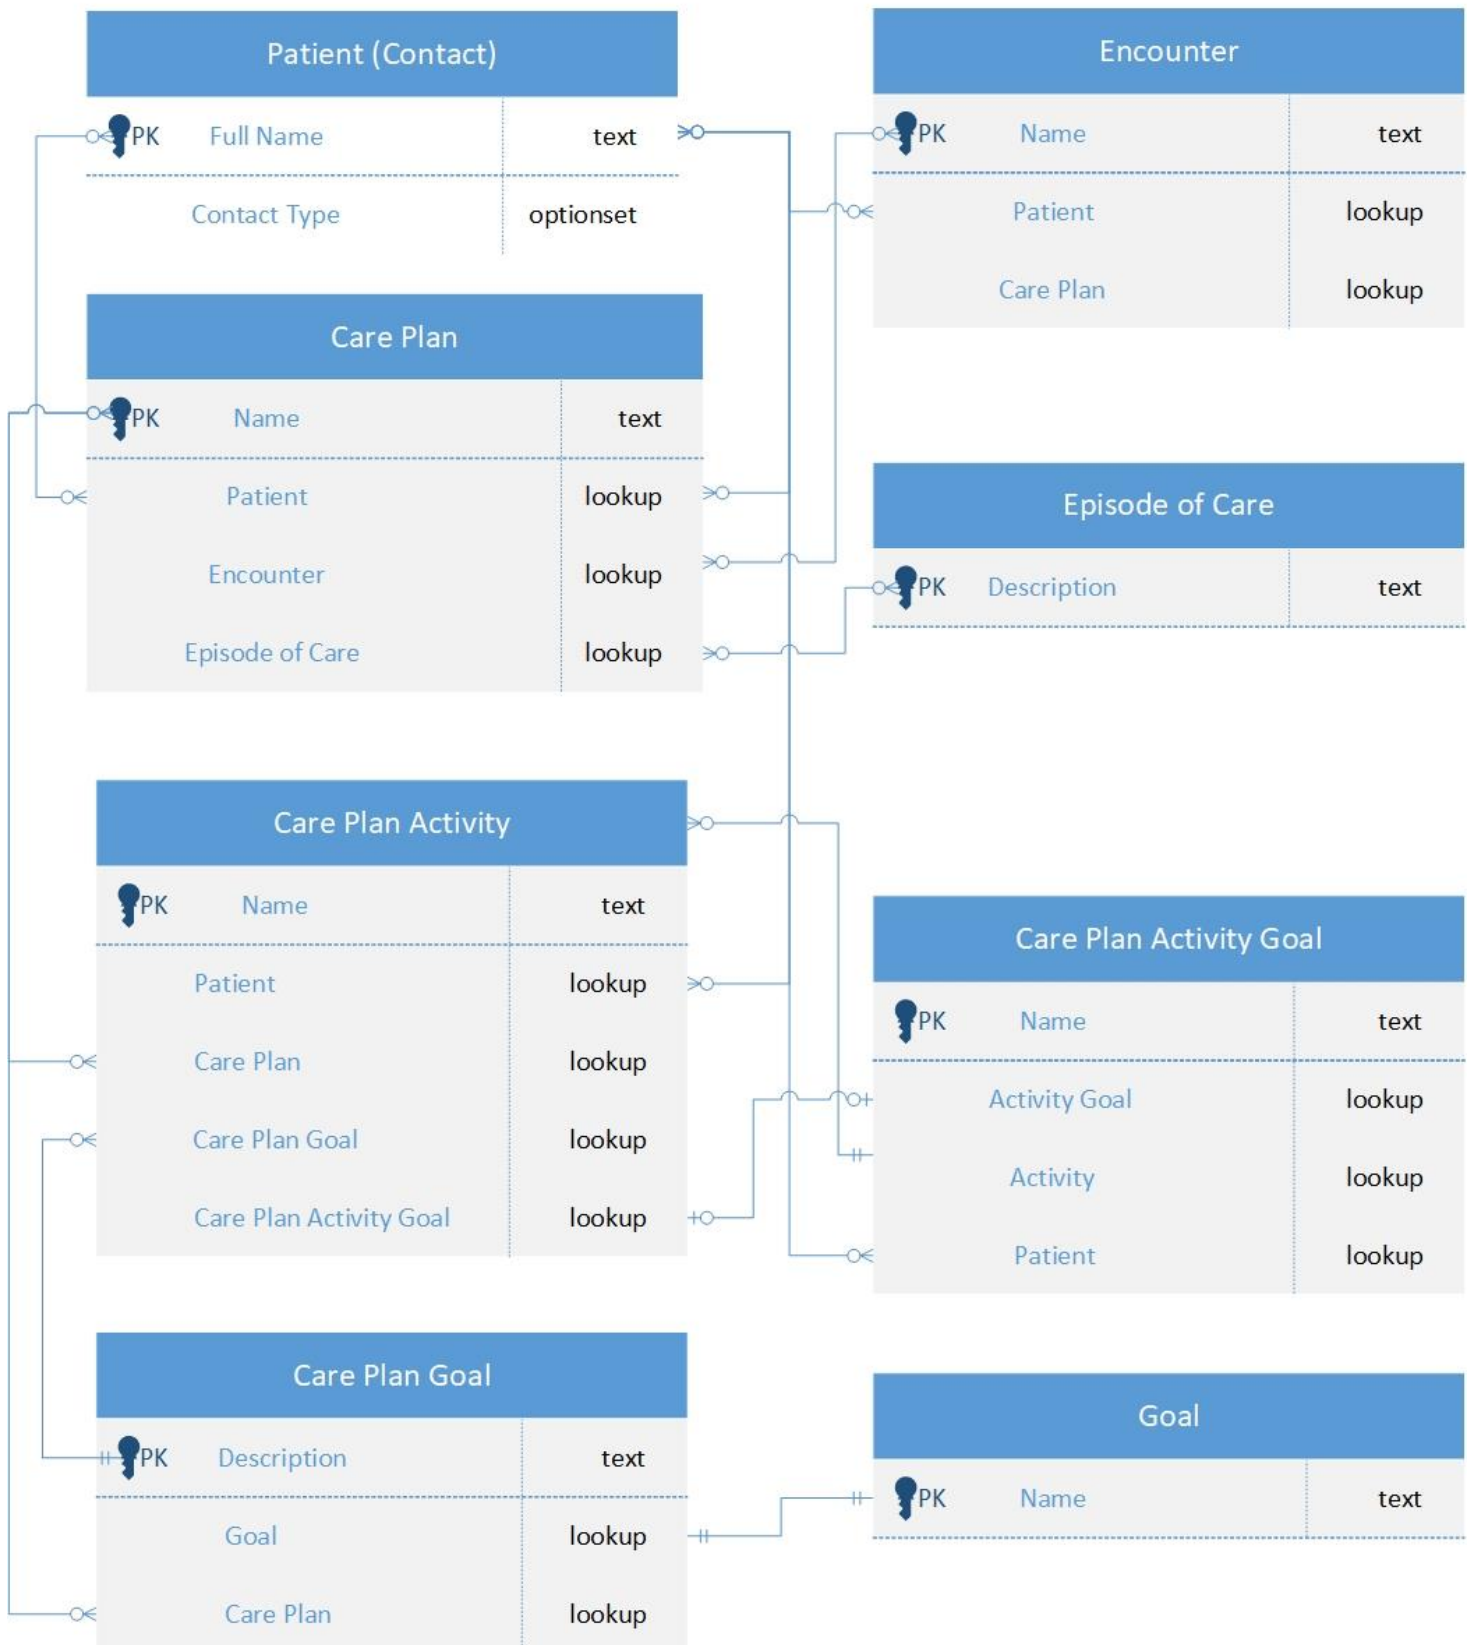

#### Care Plan Management Table Definitions

<a href="#">Patient (Contact)</a>	Person with whom a business unit has a relationship, such as customer, supplier, and colleague.
<a href="#">CarePlan</a>	Describes the intention of how one or more practitioners intend to deliver care for a particular patient, group or community for a period of time, possibly limited to care for a specific condition
<a href="#">CarePlanActivity</a>	Identifies a planned action to occur as part of the plan. For example, a medication to be used, lab tests to perform, self-monitoring, education, etc.
<a href="#">CarePlanActivityGoal</a>	Internal reference that identifies the goals that this activity is intended to contribute towards meeting.
<a href="#">Goal</a>	Target objective for a user or a team for a specified time period.
<a href="#">CarePlanGoal</a>	Describes the intended objective(s) of carrying out the care plan.
<a href="#">Encounter</a>	An interaction between a patient and healthcare provider(s) for the purpose of providing healthcare service(s) or assessing the health status of a patient.
<a href="#">Episode of Care</a>	An association between a patient and an organization / healthcare provider(s) during which time encounters may occur.

See next page for the Care Plan Management Entity Relationship Diagram.

# Care Plan Management

## Entity-Relationship Diagram

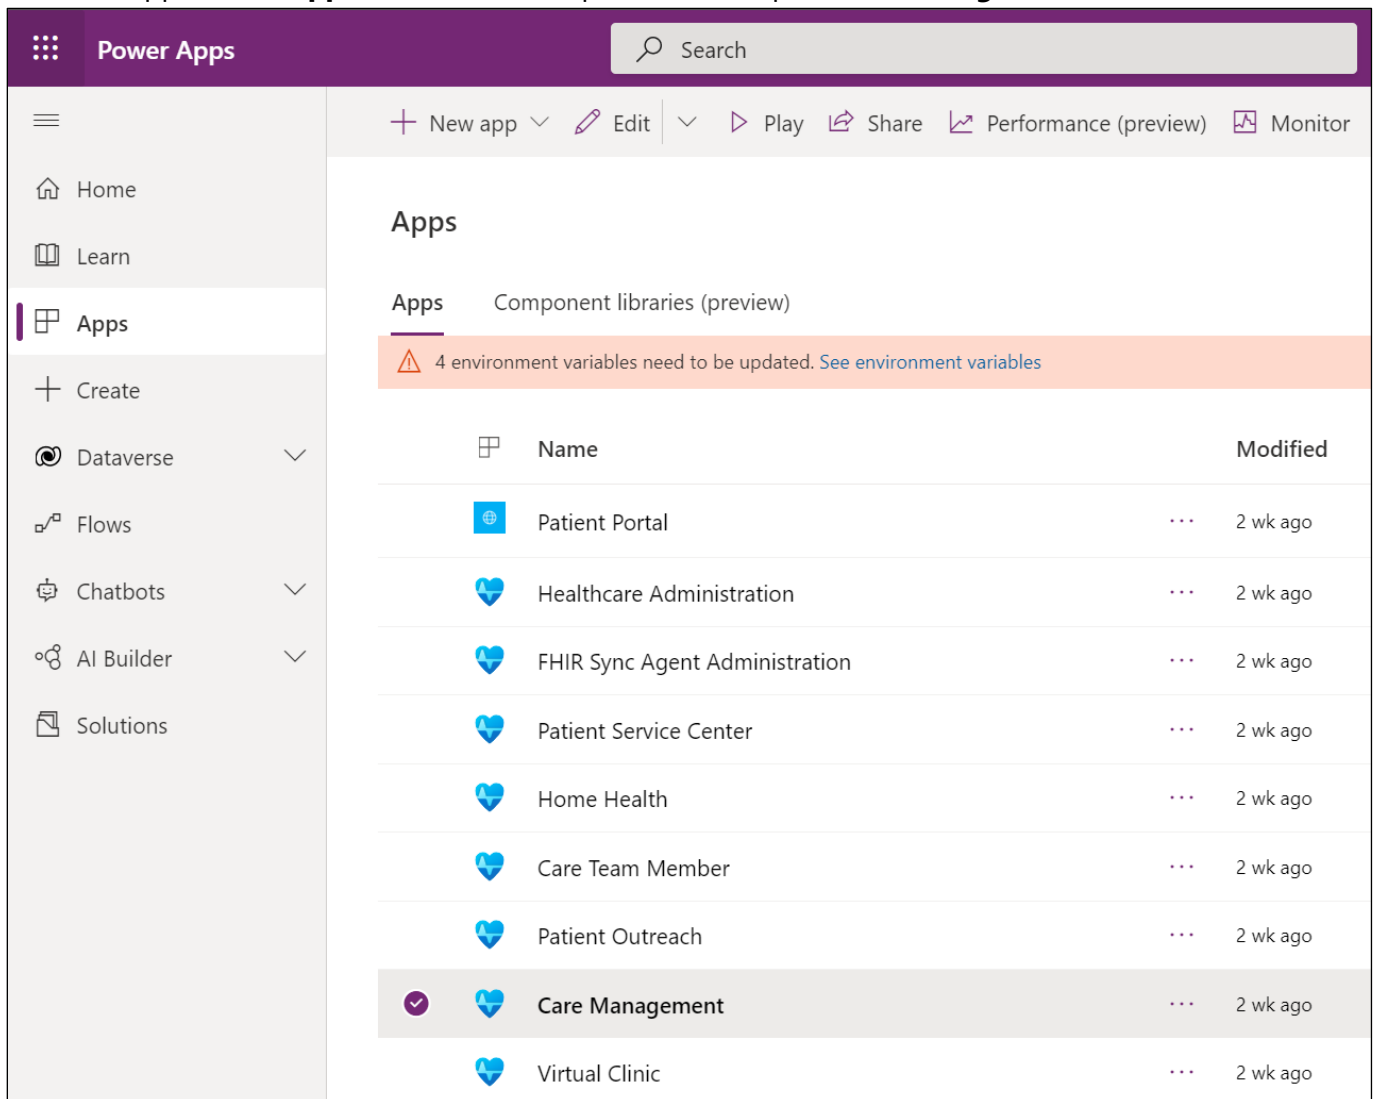

## Exercise 2: Navigate Care Management Features

In this exercise, you will navigate the patient record and explore all the detailed information that is captured about the patient by Microsoft Cloud for Healthcare. In this case, we will examine the healthcare information of Amber Rodriguez to see how a care team member would obtain a full view of the patient.

1. Navigate to <http://make.powerapps.com/> in an In-Private or Incognito window. If you are in an official training class, sign in with your assigned user.
2. Select the proper **Environment** in the upper right. If you are in an official training class, select your assigned environment.

3. In Power Apps, select **Apps** in the left sitemap. Select and open **Care Management**.

4. You will be landed in the **Health Analytics** section showing the **Care Coordinator Dashboard**. This is a helpful tool for care coordinators to get a complete view of their healthcare organization data, including care plans, care plan activities, care plan goals, appointments (EMR), and activity timeline.

13. Click on the Profile Tab to get **Patient, Address, and Insurance Information**. In the Patient Information, notice that the key patient data such as Date of Birth and Primary Practitioner are shown. The healthcare data model uses the contact entity from the Common Data Model and defines the type of contact as patient, practitioner, or related person. This determines the type of form shown.

### Patient Information

First Name	Amber
Last Name	Rodriguez
Gender	Male
Marital Status	---
Date of Birth	11/15/1965
Primary Practitioner	Jamie Evans
Email	Amber.Rodriguez@contoso.com
Home Phone	555-555-0100
Mobile Phone	555-555-0100
Business Phone	423-555-0100

14. Select the **Clinical Timeline** tab. On this tab, a care team member will be able to view a weekly calendar of the patient's clinical information as well as a list of any upcoming or previous events.

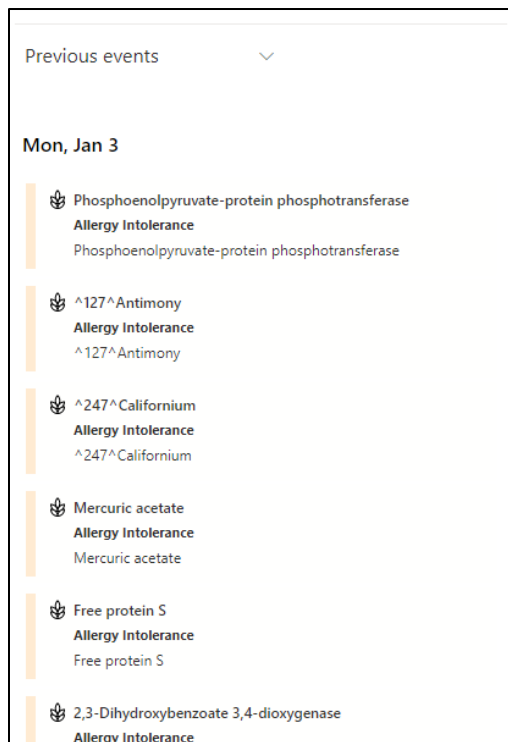

The screenshot shows the 'Patient Clinical Timeline' for Amber Rodriguez. The interface includes a header with patient information (Amber Rodriguez, 11/15/1965, Male, Married, Primary Practitioner: Jamie Evans) and navigation tabs (Summary, Profile, Clinical Timeline, Care Team, Care Plan, Related). The main area displays a weekly calendar for January 2022, with the date Jan 7 selected. A list of clinical events is shown on the left, including various allergies and intolerances. On the right, a dropdown menu for 'Upcoming events' is visible, and a message states 'No records to show.'

15. Select the **Upcoming events** dropdown in the right pane and switch to **previous events**.

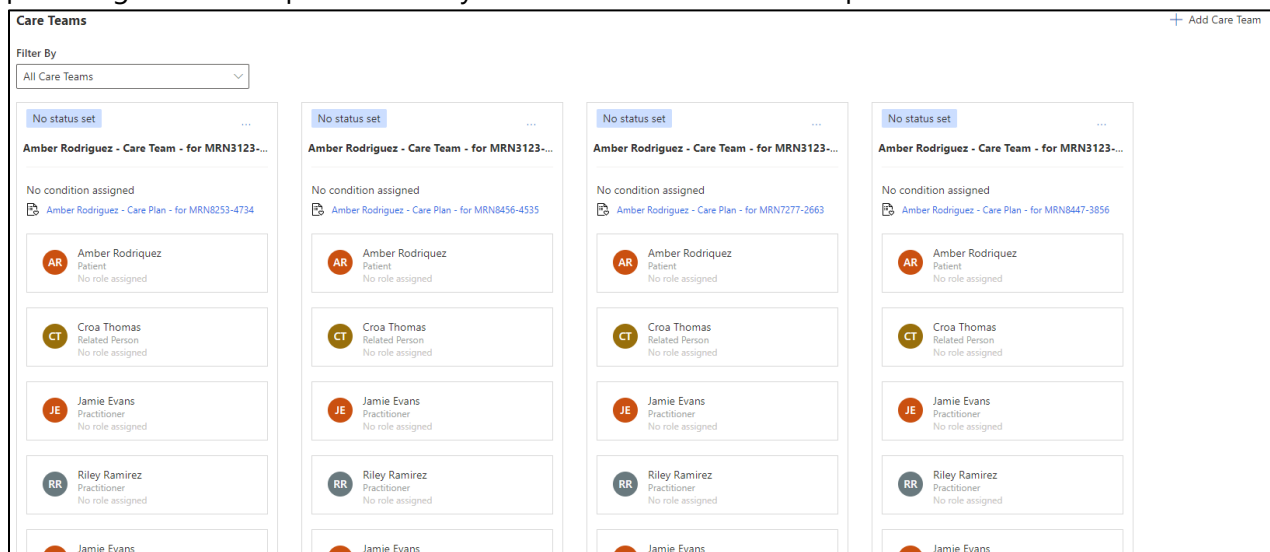

The screenshot shows a dropdown menu for 'Upcoming events'. The menu is open, displaying two options: 'Upcoming events' (highlighted) and 'Previous events' (in blue text). Below the menu, a message states 'No records to show.'

16. See the list of events Amber had previously including **Appointments**, **Care Plans**, **Encounters**, and **Medication Requests**.

17. Select the **Care Team** tab. On this tab, the care team member can find other members who may be providing care to the patient for any current conditions and care plans.

18. Select the **Care Plan** tab. On this tab, the care team member will be able to see a full view of all the Care Plans associated to the patient. This includes a list of their care plan activities and statistics for completed activities and goals. You can create a new care plan or filter by care plan type in this view.

**Congratulations!** You have explored the Care Management app and its featured data within a patient record.

## Exercise 3: Create a New Location

In this exercise, you will be creating a new Location record for the **Lamna Healthcare Company** Organization. They have opened a new branch in **Redmond, WA** and we need to ensure this location is in the system.

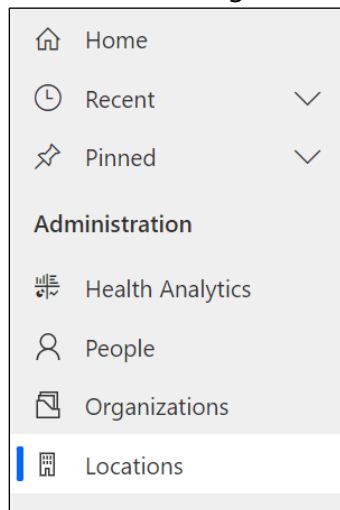

1. Select and open **Care Management** from the Apps list if you do not already have it open.

The screenshot shows the Power Apps interface. The left sidebar contains navigation options: Home, Learn, Apps (selected), Create, Dataverse, Flows, Chatbots, AI Builder, and Solutions. The main area displays the 'Apps' list with a search bar and action buttons (New app, Edit, Play, Share, Performance, Monitor). A warning message states: '4 environment variables need to be updated. See environment variables'. The list of apps includes:

Name	Modified
Patient Portal	2 wk ago
Healthcare Administration	2 wk ago
FHIR Sync Agent Administration	2 wk ago
Patient Service Center	2 wk ago
Home Health	2 wk ago
Care Team Member	2 wk ago
Patient Outreach	2 wk ago
<b>Care Management</b>	2 wk ago
Virtual Clinic	2 wk ago

2. In the Care Management sitemap on the left, select **Locations**.

The screenshot shows the Care Management sitemap. The left sidebar contains navigation options: Home, Recent, Pinned, Administration, Health Analytics, People, Organizations, and Locations (selected).

3. In the **All Locations** view, select **+New**.

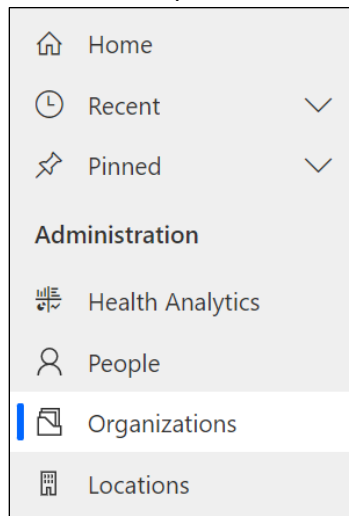

4. Fill in the following information for the new location:
- Name:** Lamna Healthcare – Redmond, WA
  - Address City:** Redmond
  - Address State:** WA
  - Managing Organization:** Lamna Healthcare Company

New Location	
<b>General</b>	
Name	* Lamna Healthcare – Redmond, WA
Address City	Redmond
Address Country	---
Address District	---
Address Period End	--- 
Address Period Start	--- 
Address Postal Code	---
Address State	WA
Alias 1	---
Alias 2	---
Alias 3	---
Description	---
Location Number	---
Managing Organization	 Lamna Healthcare Company
Operational Status	---
Mode	---

5. Click **Save & Close**. Now let's see the new location in the Managing Organization record.

6. In the sitemap on the left, select **Organizations**.

7. Change the grid view in the drop-down from "My Active Accounts" to "**Active Accounts**".

The screenshot shows the Microsoft Dynamics 365 interface. On the left is a navigation pane with the following items: Home, Recent, Pinned, Administration, Health Analytics, People, Organizations (highlighted with a blue bar), Locations, Care Management, and Clinical Data. The 'Organizations' item is selected. On the right, a dropdown menu titled 'My Active Accounts' is open. It contains a 'System Views' section with the following items: My Active Accounts, Accounts Being Followed, Accounts I Follow, Accounts: Influenced Deals That We Won, Accounts: No Campaign Activities in Last 3 Months, Accounts: Responded to Campaigns in Last 6 Months, Active Accounts (highlighted), All Accounts, Excluded Accounts Campaigns, Inactive Accounts, My Connections, Selected Accounts Campaigns, and Service Account. Each item has a pin icon on the right.

8. Once in the **Active Accounts** view, select the **Lamna Healthcare Company** Organization.

Active Accounts ▾					
Search this view 🔍					
✓	Account Name ↑ ▾	Main Phone ▾	Address 1: City ▾	Primary Contact ▾	Email (Primary Contact) ▾
	Butler Household	555-555-0102	---	Madison Butler	Madison.Butler@contoso.com
	Contoso, Ltd.	417-547-4423	Stark City	---	---
	Endoscopy and Surgicenter	---	Elma	---	---
	Endoscopy Center	---	Bayamon	---	---
	Eye Care Surgery Center	---	Glen Easton	---	---
	Fabrikam Inc	423-555-0100	Loyal	---	---
	Humongous Insurance	423-555-0100	Middlefield	---	---
	Irwin Household	555-555-0100	---	Jessie Irwin	Jessie.Irwin@contoso.com
	Jensen Household	555-555-0101	---	Casey Jensen	Casey.Jensen@contoso.com
✓	Lamna Healthcare Company	423-555-0100	Elko New Market	---	---
	Moore Houshold	555-555-0105	---	Elizabeth Moore	Elizabeth.Moore@contoso.com

9. On the Lamna Healthcare Company record, click the **Related** tab and scroll down to select **Locations**.

The screenshot shows the 'Lamna Healthcare Company' record. The 'Related' tab is active, and a dropdown menu is open, showing 'Locations' as the first option, which is highlighted with a red box. Other options in the menu include 'Medication Requests', 'Practitioner Roles', 'Procedure Requests', 'Referral Requests', and 'Medications'. The 'ACCOUNT INFORMATION' section on the left shows the account name, phone number (423-555-0100), fax, website, parent account, and ticker symbol.

10. You will see the newly created **Lamna Healthcare – Redmond, WA** location associated to the record.

The screenshot shows the 'Locations' tab for the 'Lamna Healthcare Company' record. The 'Location Associated View' is displayed, showing a table of locations. The table has columns for Name, Created On, Physical Type, Address Use, Address State, Address Period, Address City, and Type. The newly created location, 'Lamna Healthcare – Redmond, WA', is listed at the bottom of the table.

Name	Created On	Physical Type	Address Use	Address State	Address Period	Address City	Type
Contoso Pharmaceuticals	8/19/2021 3:46 PM	---	Home	PA	9/28/2020 5:2...	Ringtown	---
Fabrikam Residences	8/19/2021 3:46 PM	---	Home	IL	9/28/2020 5:2...	Galesburg	---
Lamna Healthcare – Redmond, WA	9/14/2021 4:50 PM	---	---	WA	---	Redmond	---

**Congratulations!** You created a new location in Redmond, WA for Lamna Healthcare Company using the Care Management application.

# Summary

**Nice work!** You have completed **Lab 01 - Care Management**.

In this lab, you learned how to do the following:

1. Explore the healthcare data model
2. Navigate Care Management application and patient records to discover their clinical data
3. Create a new branch location record associated with an organization
